## Product Guarantee Certificate

Duisburg, in November of 2023

We have been manufacturing woven fur out of Mohair, Alpaca, Wool, Cotton, Silk, Artificial-Silk and Acrylics since 1901 in Duisburg, Germany, where weaving mill, dye shop and equipment are all in the same place.

In our manufacturing processes we do not use any substances which contain any pesticides or chloro-organic carriers. Also we do not use any optical brightening agents (OBA) or flame retardant products.

All goods supplied by us are manufactured on our company's premises. The chemical process materials used do not contain formaldehyde.

All our products have a eudermic PH value.

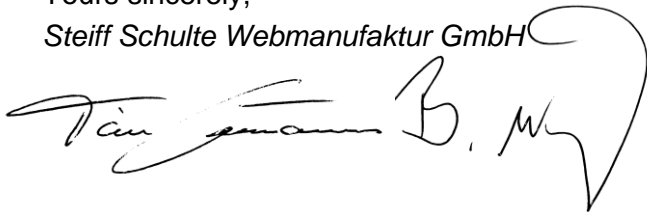

We hereby confirm that the goods supplied by us meet all the relevant legal requirements of the Federal Republic of Germany in the applicable versions, being compliant in particular with the Act on Food Products and Articles of Daily Use (LMBG) and the Commodity Goods Ordinance (BedarfsgegV).

We also explicitly declare that the azo dyes listed in the Commodity Goods Ordinance, which can release carcinogenic amines, were not used in the goods supplied by us (the list reflects the update status August 2004).

Above that we confirm that we do not apply any substances with a concentration higher than 0,1% which are named in the EU-chemicals regulation REACH or regulation GHS (see the current list of candidates [www.echa.eu](http://www.echa.eu)). In case it still should be, we are committed to inform you immediately about this.

Yours sincerely,

Steiff Schulte Webmanufaktur GmbH
